

- **Grok-3:**

- 2.7 trillion parameters, training dataset with 12.8 trillion tokens
(Resource: https://openai.org/blog/grok-3/?utm_source=chatgpt.com)
- Reasoning model
- **API:** Available
-

Model	Price (per million tokens, USD \$)
grok-3-beta • grok-3 • grok-3-latest	• Text input: \$3.00 • Text Completion: \$15.00
grok-3-fast-beta • grok-3-fast • grok-3-fast-latest	• Text input: \$5.00 • Text Completion: \$25.00
grok-3-mini-beta • grok-3-mini • grok-3-mini-latest	• Text Input: \$0.30 • Text Completion: \$0.50
grok-3-mini-fast-beta • grok-3-mini-fast • grok-3-mini-fast-latest	• Text Input: \$0.60 • Text Completion: \$4.00

1. grok-3-beta and its fast version: grok-3-fast-beta are the flagship models that excels at **enterprise tasks** like **data extraction**, **programming** and **text summarization**.
2. Grok-3-mini-beta and its faster version: grok-3-mini-fast-beta are the **lightweight** models that thinks before responding. Excels at **quantitative tasks** that involve **math** and **reasoning**.

- **Grok-2:**

- According to the source: BytePlus, Grok-2 has over 175 billion parameters.
- Not Reasoning Model
- **API:** Available
-

Model	Price (per million tokens, USD \$)
grok-2-version-1212 • grok-2-vision • grok-2-vision-latest	• Text Input: \$2.00 • Image Input: \$2.00 • Text Completion: \$10.00
grok-2-image-1212 • grok-2-image • grok-2-image-latest	Each Generated Image: \$0.07
grok-2-1212 • grok-2 • grok-2-latest	• Text Input: \$2.00 • Text Completion: \$10.0

1. grok-2-version-1212: the latest multimodal which processes **documents, diagrams, charts, screenshots, and photographs.**
2. grok-2-image-1212: the image generation model capable of generating multiple images from text prompt.
3. grok-2-1212: the latest text model with **improved** efficiency, speed and capabilities.

- **GPT-4o**
 - Model Size: Unknown
 - Not Reasoning Model
 - API: Available
 - Pricing (per 1M tokens, USD \$):
 - Input: \$2.50
 - Cached Input: \$1.25
 - Output: \$10.00
- **GPT-o1**
 - Model Size: Unknown
 - Reasoning Model
 - API: Available
 - Price (per 1M tokens, USD \$):
 - Input: \$15.00
 - Cached Input: \$7.50
 - Output: \$60.00
- **GPT-o1-mini**
 - Model Size: Unknown
 - Reasoning Model
 - API: Available
 - Price (per 1M tokens, USD \$):
 - Input: \$1.10
 - Cached Input: \$0.55
 - Output: \$4.40

- **Claude**

- Model Size: Unknown
- Reasoning Model: Claude 3.7 Sonnet. Others are not reasoning models.
- API: Available
-

Model	Price (per 1M tokens, USD \$)
Claude 3.7 Sonnet	• Input: \$3.00 • Output: \$15.00
Claude 3.5 Sonnet	• Input: \$3.00 • Output: \$15.00
Claude 3.5 Haiku	• Input: \$0.80 • Output: \$4.00
Claude 3 Opus	• Input: \$15.00 • Output: \$75.00
Claude 3 Haiku	• Input: \$0.25 • Output: \$1.25

1. Claude 3.7 Sonnet: Most intelligent and latest model.
2. Claude 3.5 Sonnet: Previous most intelligent model.
3. Claude 3.5 Haiku: Fastest model.
4. Claude 3 Opus: Powerful model for complex tasks.
5. Claude 3 Haiku: Fastest and most compact model for near-instant responsiveness.

- **DeepSeek:**
 - deepseek-chat points to DeepSeek-V3
 - Model Size: 671B MoE parameters, 37B activated parameters, trained on 14.8T high-quality tokens.
 - Not Reasoning Model
 - API: Available
 - Standard Price (UTC 00:30-16:30, per 1M tokens, USD \$):
 - Input (Cache Hit): \$0.07
 - Input (Cache Miss): \$0.27
 - Output: \$1.10
 - Discount Price (UTC 16:30-00:30, per 1M tokens, USD \$):
 - Input (Cache Hit): \$0.035
 - Input (Cache Miss): \$0.135
 - Output: \$0.550
 - deepseek-reasoner points to DeepSeek-R1
 - Model Size: 671 Total Parameters, 37B activated parameters.
 - Reasoning Model
 - API: Available
 - Standard Price (UTC 00:30-16:30, per 1M tokens, USD \$):
 - Input (Cache Hit): \$0.14
 - Input (Cache Miss): \$0.55
 - Output: \$2.19
 - Discount Price (UTC 16:30-00:30, per 1M tokens, USD \$):
 - Input (Cache Hit): \$0.035
 - Input (Cache Miss): \$0.135
 - Output: \$0.550
